

Dear MCPF users,

MCPF will **partially** resume instrument training for our users from September 7, 2020. Due to social distancing requirements, the number of training sessions for each laboratory will be limited at the beginning. Also the starting date for each lab may be different, depending on the availability of instruments. The starting dates for some major labs are listed below:

<i><b>Lab</b></i>	<i><b>Starting date</b></i>
<i>SEM Lab</i>	<i>September 7</i>
<i>TEM</i>	<i>September 14</i>
<i>FIB</i>	<i>September 14</i>

For other labs, please contact MCPF staff in charge of the labs. If the situation for COVID-19 continues to improve, the number of training sessions will be progressively increased.

Because of the suspension of training in the previous months, certain instruments have accumulated a long waiting list for training. We seek your patience and understanding for the longer-than-normal wait time.

Thank you for your attention!

MCPF
